1. PURPOSE

This document provides the steps to enable chrony in Linux servers.

2. SCOPE

2.1. In scope:

2.2. Out of scope:

3. PREREQUISITES

3.1 "ntpdate.service" should be in inactive state. If service is Active, stop the service.

3.2 "chrony-3.4-1.el7.x86_64" file set is should be installed.

4. PROCEDURE

4.1 Need to check whether ntpdate.service is started or not. If service is Active, stop the service.

To check the status and stop the service use the following commands.

#systemctl status ntpdate.service – To check the status

#systemctl stop ntpdate.service – To stop the service

```
[root@u68pnbuma01 ~]# systemctl status ntpdate.service
● ntpdate.service - Set time via NTP
   Loaded: loaded (/usr/lib/systemd/system/ntpdate.service; disabled; vendor preset: disabled)
   Active: inactive (dead)
```

4.2 Need to check **chrony-3.4-1.el7.x86_64** file set is installed or not. If it is not installed install the file set through repository.

To check file set is installed or not use the following command.

#rpm -qa | grep chrony*

```
[root@u68pnbuma01 ~]# rpm -qa | grep chrony*
chrony-3.4-1.el7.x86_64
```

4.3 Edit the /etc/chrony.conf file.

Add the **"server ntp2.myl.com iburst"** line and comment out the other entries as per below screen shot.

```
[root@u91pnbuma01 ~]# cat /etc/chrony.conf
# Use public servers from the pool.ntp.org project.
# Please consider joining the pool (http://www.pool.ntp.org/join.html).
#server 0.rhel.pool.ntp.org iburst
#server 1.rhel.pool.ntp.org iburst
#server 2.rhel.pool.ntp.org iburst
#server 3.rhel.pool.ntp.org iburst
server  ntp2.myl.com iburst
```

4.4 Start the **"chronyd.service"** service.

To start the service, Issue the following command.

#systemctl start chronyd.service

```
[root@u68pnbuma01 ~]# systemctl start chronyd.service
[root@u68pnbuma01 ~]#
```

4.5 Enable the **"chronyd.service"** service.

To enable the service, Issue the following command.

systemctl enable chronyd.service

```
[root@u68pnbuma01 ~]# systemctl enable chronyd.service
[root@u68pnbuma01 ~]#
```

4.6 The **sourcestats** command displays information about the drift rate and offset estimation process for each of the sources currently being examined by **chronyd**.

To check the chrony source statistics issue the following command.

#chronyc sourcestats

```
[root@u68pnbuma01 ~]# chronyc sourcestats
210 Number of sources = 1
Name/IP Address            NP  NR  Span  Frequency  Freq Skew  Offset  Std Dev
==============================================================================
mgwntp2.myl.com             4   3     7     -0.000    181.299     -0ns     29us
```

4.7 To check chrony tracking, issue the following command:

#chronyc tracking

```
[root@u68pnbuma01 ~]# chronyc tracking
Reference ID    : AC1A0105 (mgw-cfrtr.myl.com)
Stratum         : 3
Ref time (UTC)  : Tue Dec 03 16:37:30 2019
System time     : 0.000003480 seconds slow of NTP time
Last offset     : +0.002316313 seconds
RMS offset      : 0.002316313 seconds
Frequency       : 80.691 ppm slow
Residual freq   : +0.124 ppm
Skew            : 21.575 ppm
Root delay      : 0.298402399 seconds
Root dispersion : 0.015968155 seconds
Update interval : 65.2 seconds
Leap status     : Normal
```

4.8 If you want to step the system clock immediately and ignoring any adjustments currently being in progress, you can issue the following command.

#chronyc makestep

```
[root@u68pnbuma01 ~]# chronyc makestep
200 OK
[root@u68pnbuma01 ~]#
```

4.9 A The sources command displays information about the current time sources that **chronyd** is accessing. To check the sources issue the following command.

#chronyc sources

```
[root@u68pnbuma01 ~]# chronyc sources
210 Number of sources = 1
MS Name/IP address         Stratum Poll Reach LastRx Last sample
===============================================================================
^* mgwntp2.myl.com               2   6   377    19    -47us[ -153us] +/-  167ms
```
