4. PROCEDURE 2
5. VERSION HISTORY 7

1. PURPOSE

This document provides the steps to install and upgrade VMware Tools in Linux servers hosted in VMware environment.

2. SCOPE

2.1. Inscope:

2.1.1 We will receive RITM from VMware support team for upgrade or install VMware tool.

2.1.2 If we receive email from VMware support team, we will ask them to raise a RITM

2.1.3 We will raise a No Impact change and get approval from Technical approver to implement it

2.2. Out of scope:

2.2.1 Upgrading a virtual machine to the latest hardware version.

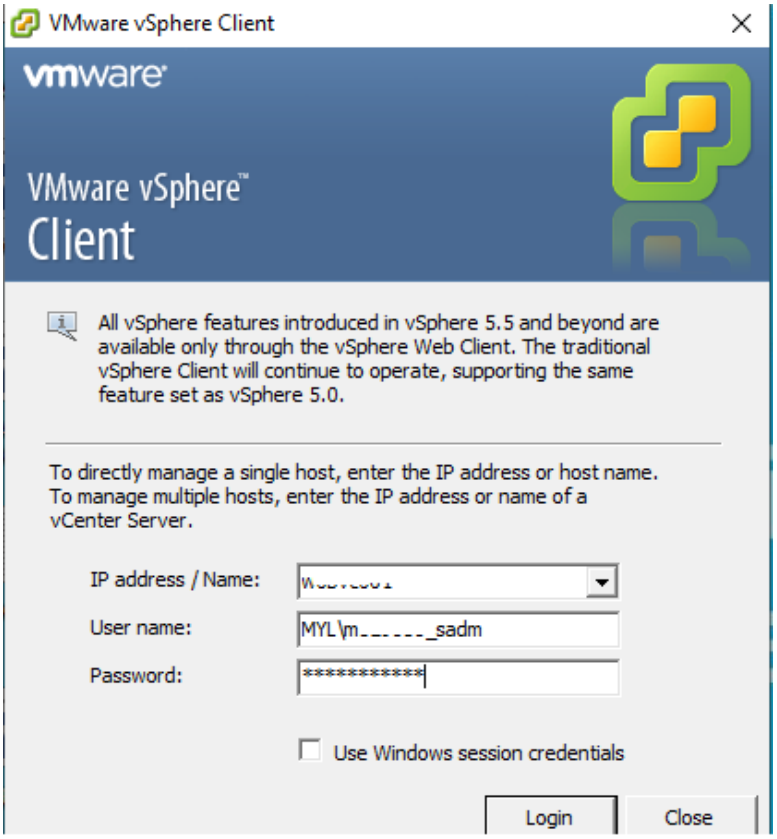

3. PREREQUISITES

3.1 User must have sadm account to perform administrator tasks at Vcenter

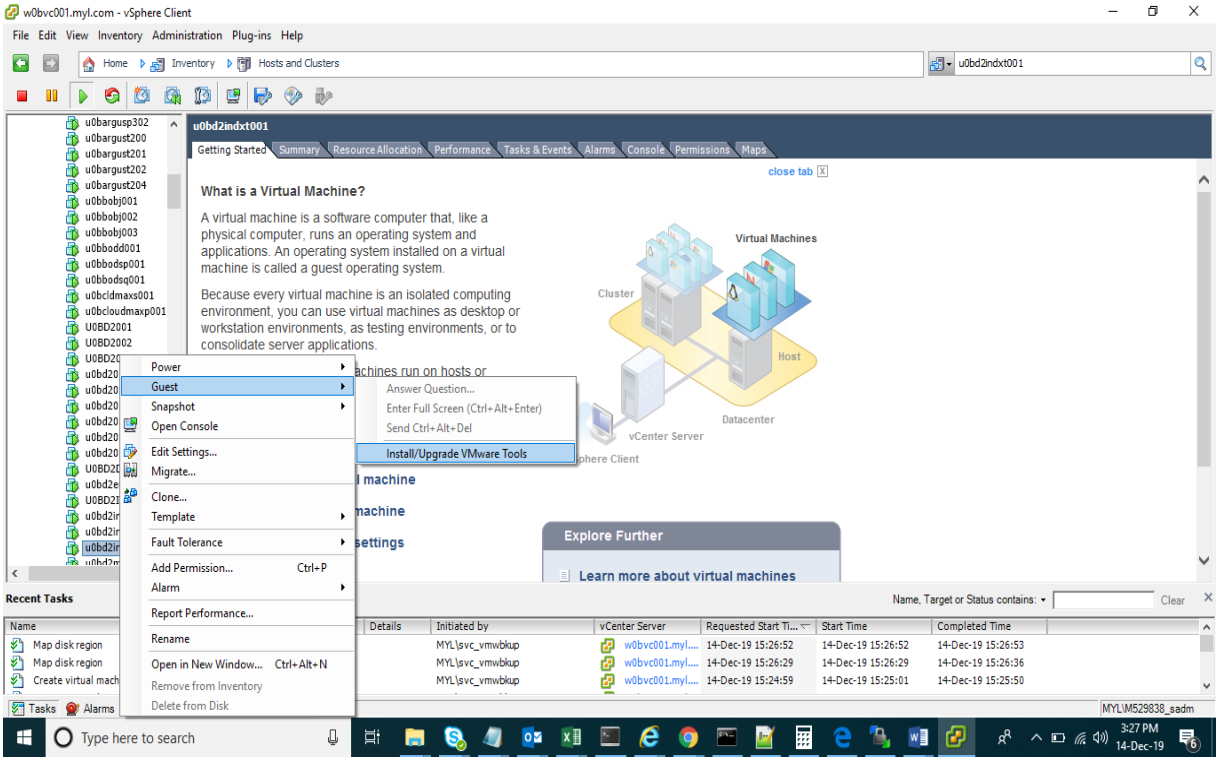

3.2 User must have sudo privilege to install package at Linux server

4. PROCEDURE

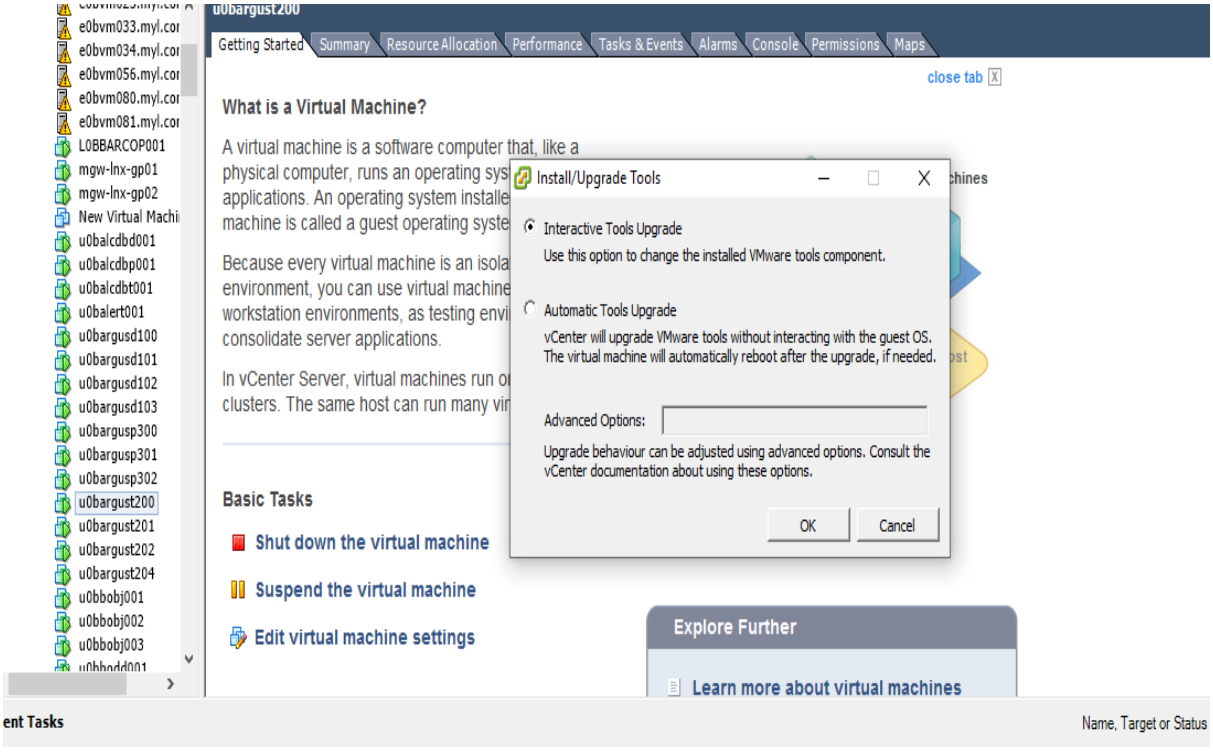

4.1 login to Vcenter with sadm account, where VM is located

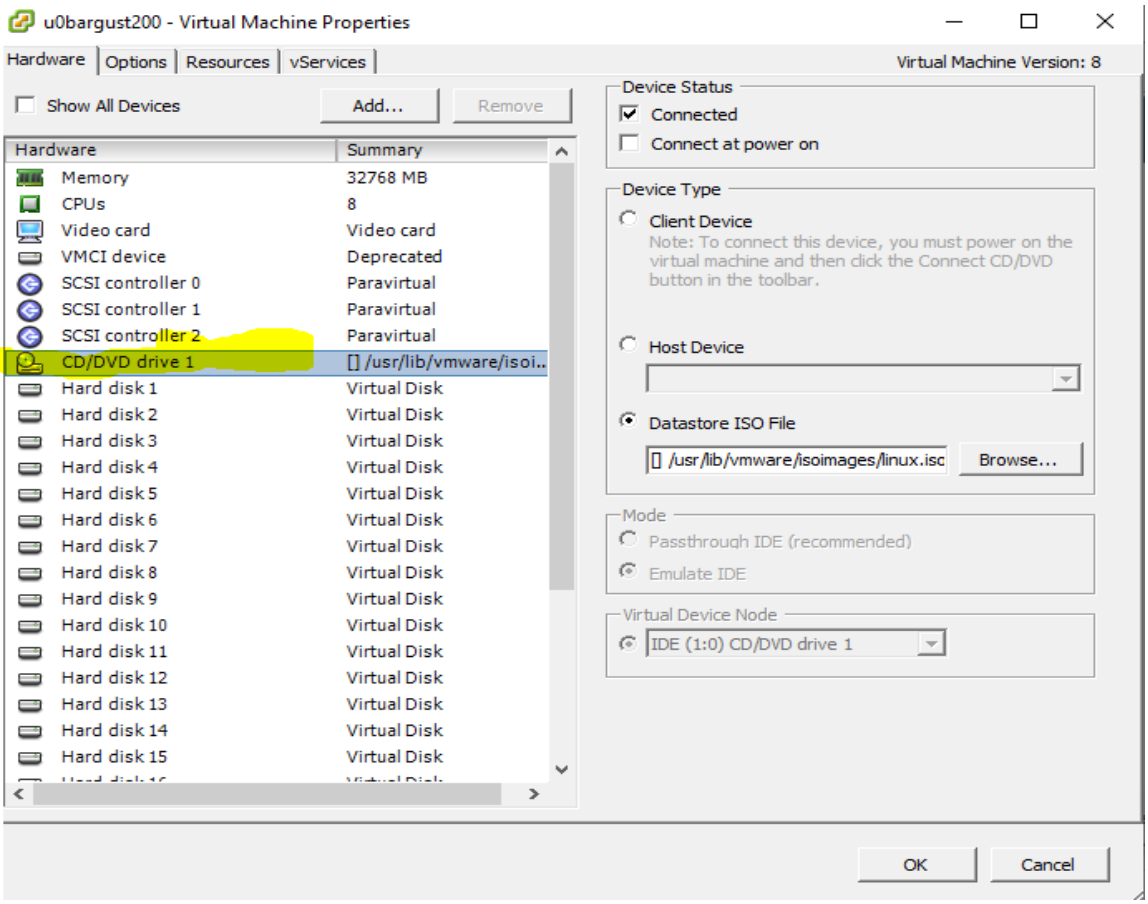

4.2 Search and Find the VM, Right Click VM in the virtual machine menu, then click Guest and select Install/Upgrade VMware Tools.

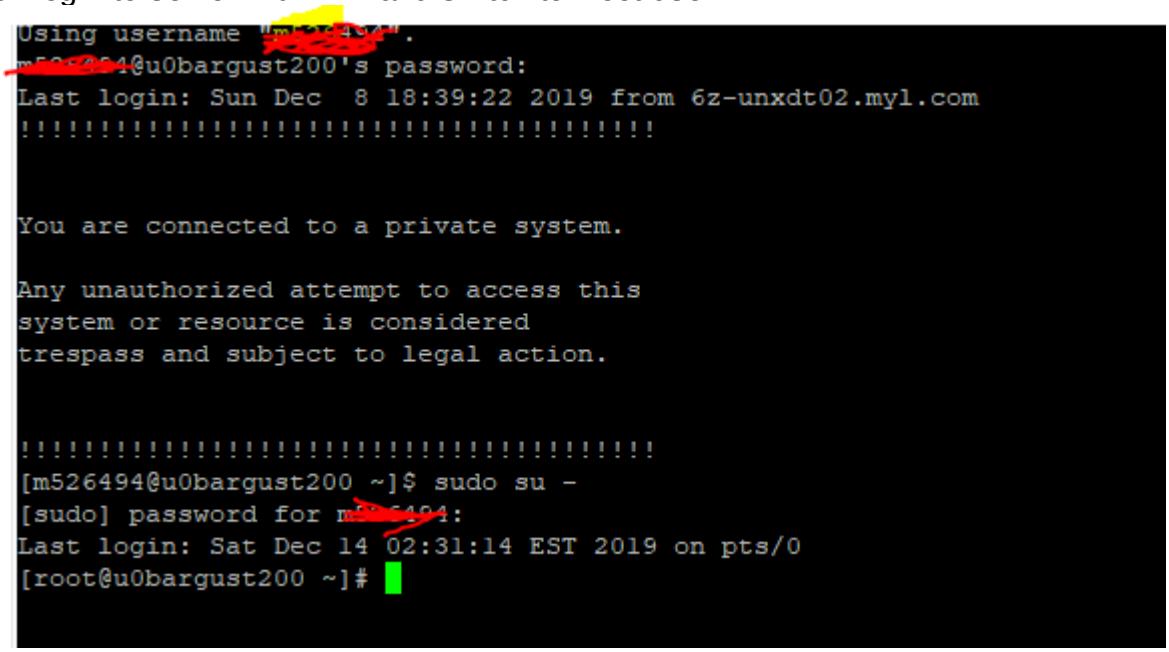

4.3 Select interactive Tools Upgrade option in “Install/Upgrade Tools” pop-up window and click “OK”.

4.4 Verify that the CDROM device is Connected from within the Edit Settings option of the virtual machine.

4.5 Then login to server with MID and switch to Root user

4.6 Verify, whether attached vmware tool iso detected at server end (/dev/sr0). If not repeat step 1 to 3

```
sds                     65:32    0   256G  0 disk
└─sds1                  65:33    0   256G  0 part
sdt                     65:48    0   256G  0 disk
└─sdt1                  65:49    0   256G  0 part
sdu                     65:64    0   256G  0 disk
└─sdu1                  65:65    0   256G  0 part
sdv                     65:80    0   256G  0 disk
└─sdv1                  65:81    0   256G  0 part
sr0                     11:0     1 70.6M  0 rom
[root@u0bargust200 ~]#
```

4.7 Mount the detected iso or cdrom to /mnt. List out all the files in the CDROM by

```
[root@u0bargust200 ~]# mount /dev/sr0 /mnt
mount: /dev/sr0 is write-protected, mounting read-only
[root@u0bargust200 ~]# cd /mnt
[root@u0bargust200 mnt]# ls -ltr
total 71888
-r-xr-xr-x. 1 root root     1850 Feb 16  2016 run_upgrader.sh
-r-xr-xr-x. 1 root root   687524 Feb 16  2016 vmware-tools-upgrader-32
-r-xr-xr-x. 1 root root   757944 Feb 16  2016 vmware-tools-upgrader-64
-r-xr-xr-x. 1 root root     2012 Feb 16  2016 manifest.txt
-r--r--r--. 1 root root 72162730 Feb 16  2016 VMwareTools-10.0.6-3560309.tar.gz
[root@u0bargust200 mnt]#
```

4.8 Compare Current VM ware tool version with attached VM ware tool iso image version. If both are same ignore below steps.

```
[root@u0bargust200 ~]# vmware-toolbox-cmd -v
10.0.6.54238 (build-3560309)
[root@u0bargust200 ~]#
```

4.9 Copy the “VMwareTools-version.tar.gz” file to /tmp directory. Change to the tmp directory and remove the directory “vmware-tools-distrib”. Extract the contents of the tar file into a new “vmware-tools-distrib” directory

```
[root@u0bargust200 mnt]# cp VMwareTools-10.0.6-3560309.tar.gz /tmp
[root@u0bargust200 mnt]# cd /tmp
[root@u0bargust200 tmp]# ls -ltr
total 336088
drwxr-xr-x. 4 root   root          32 Nov 28  2014 vmware-tools-distrib
-r--r--r--. 1 root   root   203089920 Nov 28  2014 VMwareTools-9.0.15-2323214.tar
-r--r--r--. 1 root   root    68893195 Feb  9  2017 VMwareTools-9.0.15-2323214.tar.gz
drwx------. 3 root   root          16 Oct 12  2018 systemd-private-5c304f3432df499b9970f5f064aff29b-ntpd.service-rAZqkR
drwx------. 2 root   root          39 Dec  4 13:49 vmware-root
drwxr-xr-x. 2 oracle oinstall      18 Dec 13 15:07 hsperfdata_oracle
-rw-r--r--. 1 root   root          19 Dec 14 05:44 osw.hb

-r--r--r--. 1 root   root    72162730 Dec 14 05:45 VMwareTools-10.0.6-3560309.tar.gz
[root@u0bargust200 tmp]# rm -rf vmware-tools-distrib
[root@u0bargust200 tmp]# tar -xvf VMwareTools-10.0.6-3560309.tar.gz
```

4.10 Unmount the CDROM "sr0". Note: During VMware tool installation, Server try to eject CDROM at end of the installation. Some time it was failed, and server reach to Hung state. So, you should unmount sr0 before run the script.

```
[root@u0bargust200 ~]# umount /mnt
```

Note: During VMware tool installation, Server try to eject CDROM at end of the installation. Some time it was failed, and server reach to Hung state. So, you should unmount sr0 before run the script.

4.11 Change to "vmware-tools-distrib" directory and install VMware Tools by run the PERL script "vmware-install.pl" with default option

```
drwxr-xr-x.  2 root root     64 Feb 16  2016 doc
drwxr-xr-x.  5 root root   4096 Feb 16  2016 etc
-rw-r--r--.  1 root root 282475 Feb 16  2016 FILES
-rw-r--r--.  1 root root   2538 Feb 16  2016 INSTALL
drwxr-xr-x.  2 root root     91 Feb 16  2016 installer
drwxr-xr-x. 14 root root   4096 Feb 16  2016 lib
drwxr-xr-x.  3 root root     20 Feb 16  2016 vgauth
-rwxr-xr-x.  1 root root    243 Feb 16  2016 vmware-install.pl
-rwxr-xr-x.  1 root root 205571 Feb 16  2016 vmware-install.real.pl
[root@u0bargust200 vmware-tools-distrib]# umount /mnt
```

```
[root@u0bargust200 vmware-tools-distrib]# vmware-toolbox-cmd -v
9.0.15.41796 (build-2323214)
[root@u0bargust200 vmware-tools-distrib]# ./vmware-install.pl -d
```

Note: This process takes few minutes to complete. During the installation, X window service will got restart at the end.

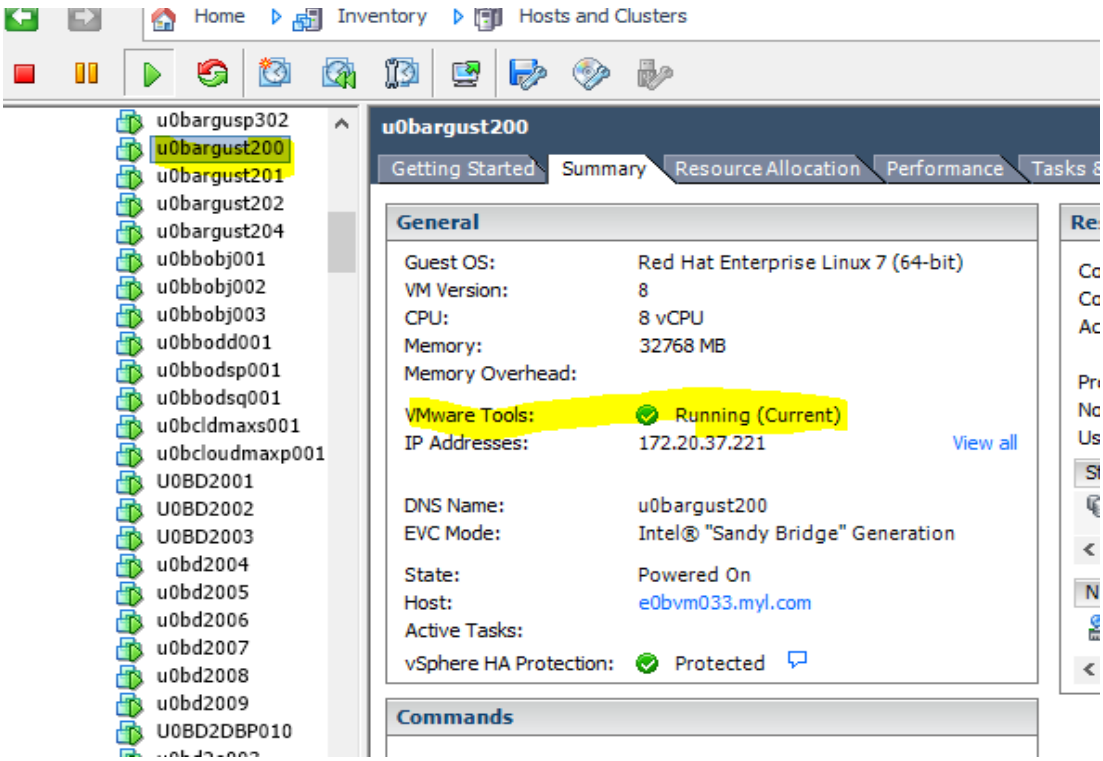

4.12 Post Installation of VM ware tool, Verify the VMware tool version by

```
[root@u0bargust200 vmware-tools-distrib]# vmware-toolbox-cmd -v
10.0.6.54238 (build-3560309)
[root@u0bargust200 vmware-tools-distrib]# date
Sat Dec 14 06:06:09 EST 2019
[root@u0bargust200 vmware-tools-distrib]#
```

4.13 Cleanup the vmware tool installation packages by,

```
[root@u0bargust200 tmp]# rm -rf VMwareTools-10.0.6-3560309.tar.gz
[root@u0bargust200 tmp]# rm -rf vmware-tools-distrib
[root@u0bargust200 tmp]#
```

4.14 Login to the Vcenter and Verify installed VMware tool version is reflected at VM summary tab.

4.15 To end the VMware Tools install, Right Click VM in the virtual machine menu, then click Guest and select End VMware Tools Install.

```
[root@u0bargust200 ~]# mount /dev/sr0 /mnt
mount: /dev/sr0 is write-protected, mounting read-only
[root@u0bargust200 ~]# cd /mnt
[root@u0bargust200 mnt]# ls -ltr
total 71888
-r-xr-xr-x. 1 root root     1850 Feb 16  2016 run_upgrader.sh
-r-xr-xr-x. 1 root root   687524 Feb 16  2016 vmware-tools-upgrader-32
-r-xr-xr-x. 1 root root   757944 Feb 16  2016 vmware-tools-upgrader-64
-r-xr-xr-x. 1 root root     2012 Feb 16  2016 manifest.txt
-r--r--r--. 1 root root 72162730 Feb 16  2016 VMwareTools-10.0.6-3560309.tar.gz
[root@u0bargust200 mnt]#
```
